

May 13th, 2018 | Your Account > How do I add another business / location / client / landing page to my account?

- Click **Add a Business** at the top of the screen
- Confirm charges (if applicable)

To add another landing page to your account, click **Add a Business** at the top of the screen. Note that you must have an extra seat available in your account to create a new landing page.

*Please note: If you have reached your profile limit, you will need to upgrade your plan. Depending on your plan, either navigate to **My Account** or get in touch for assistance.*

Enter the brand or business name and select a [URL shortname](#) for your new business. You can change either of these at any time.

Add a New Business ✕

Brand/Business

Shortname (for URL)

Copy setup from another profile?

Use another profile as a template. Its layout and content will be copied but not profile-specific settings like review site links.

Use this form to add a new review funnel landing page to your account. If you've reached your limit, you will need to [upgrade](#).

You can also copy settings from another existing landing page. These settings include layout, content, and any text, HTML, or CSS customizations you've made. It will not import review site links. To copy settings from another profile, select the profile you'd like to copy from the dropdown menu under **Copy setup from another profile?**

Press **Submit** to save your changes.
